

MOWER

FISCHER SL 2 / 3 / 4

The Fischer SL is the mower of choice for getting right to the base of the trunk.

The new precision controls allow accurate and gentle sensing of the trunk without damaging it (due to the rubber protection of the swing disc), making it suitable for young plantations.

Available in front- or rear-mounted options, the Fischer SL mower features a swing arm that is hydraulically or electrically positioned from the tractor using a controller or an electric switch.

Also suitable for use in solar power plantations, as well as orchards and vineyards.

Fischer SL specification:

- Rear- or front-mounted with hydraulic side shift

- 1 double acting control unit for hydraulic side shift needed on tractor
- Cushioned rotating swing wing disc 600 mm with spring-drawing attachment
- PTO 540/min. clockwise rotation seen in travel direction.
- Metal wheel and rollers height adjustable (4-7 cm)
- Mounted slide disc on the swing wings
- Fixed blades on main frame and mobile blades on swing wing disc
- PTO drive shaft
- CE accident protection
- Hydraulic precision sensor on one side (optional)
- One way cylinder for swing arm retraction (optional)

- Electric valve double-acting 1 element with pressure relief valve (optional)
- Electric valve double-acting 2 elements with pressure relief valve (optional)
- 2 rotating rubber front wheel height adjustment 4-12 cm (>SL310) (optional)
- 2 rubber back wheel assembly (optional)
- Chain protection in front (optional)
- Extra for mobile blades on main frame (optional)
- Cushioned rotating swing wing 800 mm with spring-drawing attachment to increase the cutting width by 20cm(optional)

	Rotors	Fixed blade	Swinging blade	HP	KG	Cutting width
SL2/125-170	2	2	2	40 – 90	576	170
SL2/140-190	2	2	2	40 – 90	590	193
