

Agrofer self-unloading bin trailer

The next generation of bin train!

These trailers have been designed for carrying bins of fruit or grapes and to allow easy self-unloading without the use of a forklift.

Lengths available for carrying three, four or five bins.

The trailer has folding footboards (200mm wide) for easier access to the bin to empty the fruit in comfortably.

A clever 'Bascule' drawbar system gives fantastic turning in and out of tight rows.

The drawbar design also enables gentle tipping of the trailer, so the bins can gently slide down the roller track to the ground without jolting the product.

Road legal with 10.0/75 15.3 tyres and wheels, min. 8 ply.

Benefits!

- * Fast – can quickly transport bins from the orchard to yard
- * Self unloading allows for a speedy turn around
- * Keeps bins out of the orchard, therefore no soil contamination

Options:

- *Hydraulic trailer brakes
- *Hydraulic operation of loading ramps
- *Road lighting kit
