

## Agrofer bin trailer

*The next generation of bin train!*

Larger model trailer showing drawbar turning angle

These trailers have been designed for carrying bins of grapes and have the option of a roller track chassis to allow easy self-unloading without the use of a forklift.

Lengths available for carrying three or four bins.

A clever 'Bascule' drawbar system gives fantastic turning in and out of tight rows.

With the optional self unloading possibility, the drawbar design also enables gentle tipping of the trailer, so the bins can gently slide down the roller track to the ground without jolting the product.

Two sets of double wheels for stability and a smoother ride.

### Options:

Roller track chassis for self unloading  
Hydraulic operation of loading ramps  
Road lighting kit  
Standard drawbar

### Benefits!

- \* Fast - can quickly transport bins from the vineyard to yard
- \* Self unloading allows for a speedy turn around
- \* Keeps bins out of the vineyard, therefore no soil contamination

| Model     | No. of bins | Trailer length excl. drawbar mm | Overall width mm | Deck height mm | Bascule d/bar length mm | Load capacity kg |
|-----------|-------------|---------------------------------|------------------|----------------|-------------------------|------------------|
| ECO/3SA S | 3           | 3640                            | 130              | 450            | 850                     | 1520             |
| ECO/4SA S | 4           | 4860                            | 130              | 450            | 850                     | 1520             |

(These are based on bin sizes of 120 x 100, although other sizes are available)
