

Perfect mowers, pulverisers and brush sweeps are renowned for their build quality, durability and long life. Van Wamel in Holland have been designing and manufacturing machines since the 1960's so have learnt a lot about what fruit or vine growers require.

Perfect RN Rotary Mower

Low, streamlined profile of this mower prevents damage to low hanging branches and fruit. Two separate gearboxes rotate the two main blades in opposite direction. Short blade placed in front of the two others and generously overlapping them give a perfect, integral cut without striping.

Standard configuration:

- *3 point linkage (cat. I + II)
- *PTO speed 540rpm
- *Walterscheid PTO shaft
- *Low, streamlined profile and round sides
- *2 front support wheels and 1 rear roller with conical ends and special covers over the bearings
- *Indirect and flexible drive through 2 gearboxes and v-belts (most belts with automatic spring loaded tensioner)
- *Generously overlapping cutting blades with opposite rotating directions and replaceable and reversible cutting edges
- *The cut material can be distributed behind or to the left and right side of the machine
- *Available in 1.8m, 2.0m, 2.25m, 2.50m, 2.9m widths.

Optional:

- Mow-spray combination (not possible with parallelogram type offset)
- Tandem roller
- Swing-away blades
- Manual or hydraulic parallelogram type offset
- Front mounted (not possible with mow-spray combination feature), rear mounted, or front and rear mounted version (not possible with parallelogram type offset feature and with the mow-spray combination)
