

FRUIT PICKING

FRUBOX

THE MODERN WAY OF PICKING FRUIT

The lightweight Frubox is the modern way of picking fruit.

Compared to traditional picking boxes, usage of Frubox reduces strain on workers.

Made of damage-resistant polymer, which is approved for use with food (CE), Fruboxes are convenient to use and are an essential item during fruit picking.

The special optional hooks allow the Frubox to be used in different ways, for example, hooked onto picking trains or platforms.

To effectively protect the fruit against any damage, the Fruboxes feature a padded interior, and there is also a purpose-built system openable bottom with a sack to allow the fruit to gently roll out when emptying.

The bottom of the box is very easy and quick to open and close.

The Frubox can also be used in packhouses for outgrades.

Dimensions: 530 x 330 x 280 mm
Weight: 3.2 kg
