

SPRAYER

OCLL Q WECTOR 3

The OCLL Q Wector 3 trailed orchard sprayers can be fitted with a 1,100-litre, 1,600-litre or 2,100-litre polyethylene tank.

The OCLL Q Wector 3 sprayers benefit from a 1,750mm anti-drift tower with an air-intake fan positioned in front of the tower. This prevents debris or spray from being drawn in while the sprayer is in operation.

Ideal for spraying in orchards up to 4-metres high, the OCLL Q Wector 3 lowest nozzle is placed 300mm from the ground.

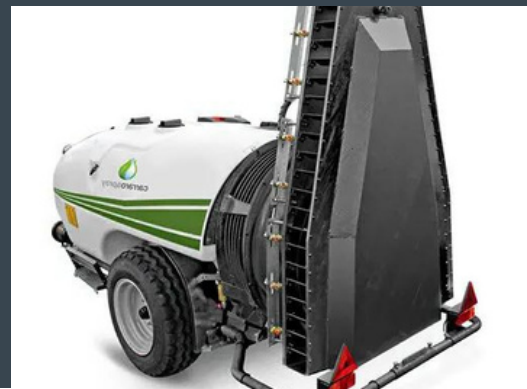

The sprayer can also be fitted with a SprayTrol monitoring system which has a number of unique programmable features to help make life easy for operators.

OCLL sprayers have been sold by us for many years as an

economically priced range of sprayers. They are well built and use good quality pumps giving many years' service and reliability. Modern design with smooth lines means that no damage is caused passing through the crop.

Q Wector 3 sprayer specification:

- Galvanised steel frame and anti-drift tower with frontal suction, top and adjustable deflectors
- Adjustable tracking drawbar
- Polyethylene tank with external drain
- 100 lt system washing tank on 1000 lt model and 115 lt washing tank for 1500l and 2000l versions
